DETAILED ACTION

Claims 1-65 are pending in this application.

This restriction requirement supercedes the office action requirement of Paper No.2.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-53 drawn to products, variously classified in classes 540, 544, 546, 548 and several subclasses.
- II. Claims 54-65, drawn to methods of use of compounds variously classified, in classes 514, 544, 546, 548 and several subclasses.

The inventions are distinct, each from the other because of the following reasons:

Invention Groups I and II are related as product and method of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different method of using the product (MPEP 806.05(h)). In the instant case, the product as claimed can be used in a materially different method of using the product as demonstrated throughout the specification and in claims 54-65 which are directed to several methods of using the product, for example treating epilepsy, asthma etc. Therefore a separate search considerations are involved, which would impose a burden if unrestricted.

The above groups themselves are inclusive of patentably distinct subject matter. Accordingly, along with the election of one of the above groups, the following action is also taken.

Art Unit: 1626

Claim 1 is generic to a plurality of disclosed patentably distinct species comprising, for example, the compounds of (1) Example 6, page 64, Example 7, page 65, Example 51, page 98 etc., (2) the method of treating epilepsy using the compounds as in Example 1, (3) the method of treating asthma using the compounds as in Example 1 etc. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper.

Upon the election of a single disclosed species (e.g. Example, page number and structural depiction), a generic concept, inclusive of the elected species, will be identified by the Examiner for examination. Moreover, whatever specific compound is ultimately elected, applicants are required to list all claims readable thereon.

In accordance with M.P.E.P. 821.04 and *In re Ochiai*, 71 F.3d 1565, 37 USPQ 1127 (Fed. Cir. 1995), rejoinder of product claims with method of use claims commensurate in scope with the allowed product claims will occur following a finding that the product claims are allowable. Until such time, a restriction between product claims and process is deemed proper. Additionally, in order to retain the right to rejoinder in accordance with the above policy,

Art Unit: 1626

Applicant is advised the process of use are amended during prosecution to maintain either dependency on the product claims or to otherwise include limitations of the product claims.

Failure to do so may result in a loss of the right to rejoinder.

A telephone call was made to Evelyn D. Shen, on 03/20/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
